

ACTION ENGINE POWERS ON-DEVICE WIRELESS STOREFRONT FOR MOTRICITY FUEL PLATFORM

Companies Unite Technologies to Offer a Superior User Experience for Mobile Content Preview, Purchase and Download

BELLEVUE, WA—February 6, 2006—Shattering the mobile usability barrier, Action Engine® Corporation, the mobile application platform leader, today announced that it was selected by Motricity to offer an on-device storefront into the wireless content that is delivered through the Motricity Fuel Platform.

“Action Engine understands that wireless consumers don’t want to suffer through dozens of keystrokes and between-click wait times to find mobile content,” said Brian Dally, Motricity vice president of product realization. “Their unique offline approach to searching for and discovering wireless content makes them an ideal partner to deliver world-class storefront solutions for our customers.”

Available for demonstration today, the stor
