

Atlantik Systeme to Distribute Voltaire Products in Germany

CHELMSFORD, Mass. and RA'ANANA, Israel – December 8, 2010 – Voltaire Ltd. (NASDAQ: VOLT), a leading provider of scale-out data center fabrics, today announced that it has signed an agreement with Atlantik Systeme to distribute its products in Germany. Atlantik Systeme has also joined Voltaire's adVantage Partner Program.

The agreement will make Voltaire's complete portfolio of 10 Gigabit Ethernet and InfiniBand switching platforms and management and application acceleration software available to the German market.

"We are pleased to enter into a distribution agreement with Atlantik Systeme in Germany," said Patrick Guay, executive vice president global sales and general manager, Voltaire. "Atlantik Systeme's solid reputation in technology product distribution and network design consulting made them a fitting partner and extension of our global sales team."

"Voltaire solutions deliver on the new networking requirements of scale-out, cloud and virtualized data centers," said Ottmar Flach, chief executive officer, Atlantik Networxx AG. "When it comes to the data center network, we work closely with our customers to improve operational efficiency and maximize application performance while finding new ways to make the network work harder. Voltaire's switches and unique software solutions do just that by offering performance, low power consumption and ultra-low latency to help our customers operate efficiently and stay ahead of the competition. We are pleased to be adding Voltaire products to our line card."
