

## Interxion Reports 2009 Results

**AMSTERDAM 13 April 2010** – Interxion, a leading European provider of carrier-neutral colocation data centre services, today released its audited numbers for the year ended 31 December 2009.

### Highlights:

- Revenues increased by 24% to €171.7 million (2008: €138.2 million) (On a “constant currency” basis, revenues increased by 26%).
- Adjusted EBITDA increased by 30% to €62.7 million (2008: €48.3 million).
- Adjusted EBITDA margin improved to 36.5% (2008: 34.9%).
- Net profit was €26.5 million (2008: €37.4 million).

In 2009 Interxion again achieved significant top-line growth with improved margins. During the year the company continued its data centre expansion programme, increasing the amount of equipped space in its facilities by approximately 11,600 m<sup>2</sup>. This included the completion of site expansions in Amsterdam, Brussels, Copenhagen, Frankfurt, London, and Madrid, as well as the completion of two new-build data centres in Paris.

“Our business continues to show good levels of profitable growth, recurring revenue visibility and low customer churn,” said David Ruberg, Interxion CEO. “In 2010 we will continue with our demand-led expansion plans, focusing on profitable growth and continuously improving customer service.”

### About Interxion

Interxion is a leading provider of carrier-neutral colocation data centre services in Europe, serving over 1,100 customers through 27 data centres in 11 European countries. Interxion’s uniformly designed, energy-efficient data centres offer customers extensive security and uptime for their mission-critical applications. With connectivity provided by 350 carriers and ISPs and 18 European Internet exchanges across its footprint, Interxion has created content and connectivity hubs that foster growing customer communities of interest.
